Water and Wastewater Treatment Market 2019

Description: -

Wastewater treatment is a process used to convert wastewater into an effluent (outflowing of water to a receiving body of water) that can be returned to the water cycle with minimal impact on the environment or directly reused. The latter is called water reclamation because treated wastewater can then be used for other purposes. The treatment process takes place in a wastewater treatment plant (WWTP), often referred to as a Water Resource Recovery Facility (WRRF) or a sewage treatment plant. Pollutants in municipal wastewater (households and small industries) are removed or broken down.

Increasing global water stress coupled with industrial wastewater disposal in aquatic ecosystems has led to a boost in the water reclamation requirements. In order to curb these growing issues, the consumption of effective treatment equipment systems is likely to propel over the forecast period. The rise in industrial activities and growing contamination have further demanded the treatment of water to make it suitable for end-use purposes. People awareness toward environmental pollution is also a key driver for water and wastewater treatment market. The Asia Pacific water & wastewater treatment equipment market is projected to grow at the highest CAGR during the forecast period due to the growing demand of potable water in this region. Middle East is estimated to witness steady growth at 4.7% CAGR owing to the increasing population, the rise in the disposable income and the infrastructure availability. The U.S. is one of the major consumers of wastewater treatment equipment is expected to enhance the growth over the following years.
