A mobile point of sale (mPOS) is an electronic payment system that transfers funds by debit and credit cards at POS terminals situated at retail outlets. mPOS systems are equipped with capabilities such as smart card capabilities, RFID, Wi-Fi and VoIP. These systems are used to check price, manage assets at retail stores, receive and send invoices, capture signatures and to send digitized notes. This helps the retailer to exchange data within and out of store sites through wireless applications. mPOS systems are attached with Bluetooth-enabled printers which allows them for faster checkout during heavy traffics. mPOS systems aid retailers to deliver value-added facilities, with the necessities of speed and convenience being accomplished.

Demand Scenario

The global Mobile POS Systems market was USD 163.5 million in 2018 and is estimated to reach USD 540.92 million by 2025 registering a CAGR of 18.64% during the forecast period

Growth by Region

Asia Pacific is estimated to be the fastest growing region in the POS system market, due to rise in digital payments, growth of regional retails and hospitality industries. Europe and the United States are also significantly contributing a market share, any change in the strategy from United States might affect the development trend of Mobile POS Systems.

Drivers vs Constraints

The primary growth driver for Mobile POS market is the growing demand for mobile payments. The increasing use of mobile Internet allows the user to rapidly process mPOS and close the sales process. Furthermore, the rise in the use of smartphones and tablets across the globe permits the merchants and retailers to integrate mPOS into their payment process. However, lack of high-speed network connectivity due to lack of network infrastructure is a major setback in mobile POS systems market. This challenge is dominant in developing countries as compared to that of developed countries.

Industry Trends and Updates

In Aug 2017, Samsung Electronics America Inc. and NCR CORPORATION launched NCR Silver Quantum an all in one POS commerce station. The feature in this system includes loyalty scanner, mobile wallet acceptance capability and customer display, all integrated in a Samsung Galaxy tablet. This technology helps in back-office operations and improved customer POS transactions.

In Jan 2018, Epson America Inc. launched new OmniLink multi-function thermal POS receipt printer. It allows users to have interactive transaction experience, using mobile devices and also helps them to scan and check their items and print receipts online.
