

Water Treatment Products 2019 Global Market Share, Trends, Segmentation & Forecast To 2025

Wiseguyreports.Com Adds "Water Treatment Products – Global Market Growth, Opportunities, Analysis Of Top Key Players And Forecast To 2025"

PUNE, MAHARASTRA, INDIA, October 15, 2019 /EINPresswire.com/ -- Global [Water Treatment Products](#) Industry Market Research Report

Market Overview:

The products that improve the quality of water in order to make it more acceptable for a particular application be it drinking, irrigation, water recreation or any other application are called water treatment products. The process either removes or reduces the concentration of contaminants or undesirable components. This process of water treatment is very important to human beings. The water should be pure enough so that it can be consumed by humans without any immediate or long term risk or any harmful health effects.

The processes involved in purifying water are a combination of both physical, chemical, and biological processes. Water quality is not only important while being treated but also during its conveyance and distribution after treatment. The residual disinfectants are therefore kept in the water to kill any contamination that may occur during distribution. There are many water treatment technologies available currently throughout the world. Each method is different from the other and can vary significantly in its cost and effectiveness. No single solution is viable financially or optimally to treat the different types of water and the different types of contaminants.

The report published regarding the global water treatment products industry elaborates on the major players, applications, and types of water treatment product market in detail. An analysis of the market status from the year 2014 to 2019 along with the competition pattern and the advantages and disadvantages of enterprise products are included in the report. The industry development trends for the years 2019-2024 have been forecast. The macroeconomic policies, industrial policies, and the regional industrial layout characteristics are included. In a nutshell, the report helps a person understand the characteristics and the market for water treatment products.

Major Players in Water Treatment Products market are:

Hubbard-Hall
Kurita Water Industries
Coyne Chemical
Dow
Chemco Products, Inc.
BASF

Veolia Water Solutions & Technologies
Kemira
Air Products and Chemicals
Dupont
Evonik
GE Water&Process Technologies

Segmentation:

The global water treatment products industry can be segmented on the basis of the types of water treatment products in the market along with the various applications of the product.

Market split on the basis of the type of product:

Antifoams: A chemical additive that hinders and lessens the formation of foam.

Disinfectants: Antimicrobial agents applied to destroy microorganisms.

Neutralizing agents: A chemical substance that reacts quantitatively with either an acid or a base.

Others

Market split on the basis of applications:

Industrial water treatment: Industrial water treatment includes all the aspects that include cooling water treatment, industrial wastewater treatment, and boiler water treatment.

Residential water treatment: Treating water for residential applications.

Regional overview:

The major regions that play an important role in the water treatment product market are South America, India, the Middle East, Africa, Japan, China, Europe, and North America among others. The regional industrial layout characteristics and macroeconomic policies are included. The supply chain which starts from the raw materials all the way to the end consumers are analyzed scientifically, with the product circulation and sales channels also presented. The revenue(in US\$), gross margin, price, and production volume of water treatment products with respect to the regions for the years 2014 to 2019 are mentioned in the report. Furthermore, the export and import, consumption and the production of water treatment products from the year 2014 to the year 2019 are presented.

Industry news:

A US\$20 million treatment facility was recently inaugurated by the City of Prior Lake and the

Shakopee Mdewakanton Sioux Community. It is built to meet the requirements of both the burgeoning communities for the next 20 years. The plant combines both financial and environmental efficiency, said officials. With the communities using one facility, the drain on groundwater is reduced while saving money. According to the data, around US\$3 million and US\$6 million respectively is saved instead of building their own facilities.
