Car is one of the most useful and convenient vehicles, and since huge investment is made to purchase the vehicle, it becomes necessary to properly take care of it, and it should be your priority. The auto beauty industry made almost \$41 billion in revenue, which is a part of the

automotive market sales.

When talking about the beauty market, the first thing that comes to mind is makeup, and this even applies to the automotive as well. With the help of auto beauty products, the surface damage, which the four-wheeler vehicles mostly suffer from can be easily fixed. The industry of auto beauty is one of the significant parts of the market.

#### Market Segmentation

The auto beauty products for the four-wheelers play a significant role in maintaining the overlook of the car. The use of car cleaning and caring products such as the car shampoos helps to maintain the paint of the car, and you won't have to worry about chipping or dulling of the paints. Also, it is necessary to check the list of the chemicals, which will help to protect the car.

Just like the cleaning of the vehicles, polishing them is also necessary as it helps to restore the paint, and also helps to hide a lot of scratches, swirl marks, etc. Also, the application of the polishes helps to enhance the appearance of the scratches, deep penetrating marks, and scratches on the surface of the car body. After the application of the polishers, it adds a protective layer to the car.

Waxing is considered as one of the less harsh cleaning processes as it doesn't include the uses of any harmful chemicals, which tend to affect the car paint with time. It is one of those effective auto beauty products, which helps to add an extra layer of protection from chipping, scratching, and also makes the automotive look sparkle clean.

The use of sealing and coating products is also, essential when it comes to the auto beauty products for the four-wheelers. It helps to provide protection, and acts as a permanent layer, and is not the same as the traditional paints. These are extremely effective, and protecting your vehicle, and can only be removed by abrasion.

Some of the common types of auto beauty products, that are mostly used are cleaning & caring, sealing glaze & coating, polishing & waxing, etc.

The use of car polishing products is extensively used in a lot of countries mostly North America (U.S., Canada, and Mexico), Europe (Germany, France, Russia, Italy, U.K, Spain, etc), South America (Argentina, Brazil, etc), Middle East & Africa (Saudi Arabia, South Africa etc).
