

IT Service Management (ITSM) Software Market 2019 Global Analysis, Growth, Size, Share, Trends, Forecast to 2025

IT Service Management (ITSM) Software Market: Global Analysis, Share, Trends, Application Analysis And Forecast To 2024

PUNE, MAHARASHTRA, INDIA, October 17, 2019 /EINPresswire.com/ -- [IT Service Management \(ITSM\) Software Industry](#)

Description

IT service management refers to the set of procedures which are developed to deliver advanced information technology services to organizations and within the need of consumers. The primary factor fueling the market growth is the growing number of employees who are utilizing personal IT technological tools at the workplace. IT service management software is important for numerous reasons. Implementing this software can help regularize procedures through structured delivery and efficient documentation. IT service management software implementation can help in saving costs by developing a reliable IT org.

Implementing such software can benefit organizations by generating actionable IT insights that can further assist in decision making. IT service management software enables increased visibility and understanding of information technology services. The emergence of cloud computing that has significantly impacted the way businesses operate, is the main trend witnessed by the global IT service management market. The rising adoption of cloud-based solutions has brought a significant change in the operating models of an organization. Additional factors such as the rising adoption of information technology services in various industry verticals are benefiting market growth.

According to the research, in the year 2017, the global Information Technology Service Management Software market size was about US\$1810 million and it is anticipated to reach US\$4380 million by the end of the year 2025, growing with a CAGR of about 11.7% during the forecast period. According to the research, owing to the features such as incident and problem management, standard procedure and process for modification management, and configuration and IT asset management, there is an increased demand for the IT service management software.

The following Manufacturers are Covered in this Report: ServiceNow, Atlassian, Ivanti (HEAT Software), IBM, CA Technologies, BMC Software, ASG Software, Axios Systems, SAP, Cherwell Software, Micro Focus (Formerly HPE), Freshworks, Ultimo, Epicor, TOPdesk, Samanage, Agiloft Service, Symantec, SysAid, SolarWinds, Autotask
