

# Developments further signal dynaCERT's award winning technology headed for mainstream adoption

*dynaCERT Inc. TSX-V:DYA OTCQB:DYFSF FRA:DMJ technology reduces NOx ~88%, CO ~50%, and particulate matter ~75%, all while increasing fuel-savings up to ~20%.*

NEW YORK, NY, USA, October 21, 2019 /EINPresswire.com/ -- [dynaCERT](#) Inc. (TSX VENTURE: DYA) (OTCQB: DYFSF) (FRA: DMJ) this past week announced the Company has established a strategic alliance with MOSOLF Group of Europe, including a MOU for an initial order of 1,000 units in 2020 and plans for penetration into the European market -- further demonstrating the technology is headed for mainstream adoption. This news follows the recent news of dynaCERT receiving its certificate of approval for sale and installation of units into the EU, and of news that dynaCERT has received its first institutional coverage; the independent investment bank GBC AG, headquartered in Augsburg, Germany, initiated coverage with a 'BUY' rating with significant near-term upside share price appreciation.

dynaCERT HG unit installed on diesel Truck

dynaCERT's proprietary HG technology has received top award at the 2019 Mining Cleantech Challenge in Colorado, dynaCERT won the 2019 German Innovation Awards prize for Energy Solutions, and last year it was the Gold Medal winner of the 2018 Edison Award for Best New Product. The technology acts as a catalyst; hydrogen has a 9 to 10 times flame spread which helps the engine burn diesel more completely, resulting in more power, less carbon fouling, and a reduction in pollutants (reduces NOx ~88%, CO ~50%, and particulate matter ~75%, all while increasing fuel-savings up to ~20%).

“

After dynaCERT's recent KBA Homologation in Germany, the road has been paved for an intense marketing campaign on a continent where dynaCERT's technology is much-needed...”

*Dr. Joerg Mosolf, Chief Executive Officer of the MOSOLF Group*
