## Description

Cheese alternatives are often referred to as cheese substitute or imitation cheese. The cheese alternative refers to the products that are manufactured with better nutritional values than natural cheese. The characteristics, formation, and application of the cheese alternatives are similar to the natural cheese. But the cheese substitute offers enhanced health benefits to the consumers. The production of the cheese alternatives involves the replacement of milk fat and milk proteins either wholly or partly with the vegetable fats, oils, and vegetable proteins.

A wide variety of cheese alternatives are increasingly becoming available in the global market. Some of the common cheese alternatives are partly hydrogenated vegetable fats like palm, soybean, soybean protein, and peanut protein. Seed and nut oils like cashew nut oil, almond nut oil, mustard oil, and sunflower oil are other effective substitute sources. The growing health consciousness among the young generation is expected to increase the demand for the global cheese alternatives market.

The growth in the demand for gluten-free as well as lactose-free products propels the growth of the cheese alternatives market across the globe. The multiple benefits of the cheese substitutes are a major factor responsible for its growing demand. The low cost of cheese alternatives further augments the global market growth. The availability of the substitute in different variants and tastes further accelerates the growth of the global market. The existence of the demand for natural cheese in many different regions of the world is a potential barrier to the growth of the cheese alternatives market.
