their biomass content is also likely to escalate the market growth. However, lack of product differentiation, existence of multiple vendors, and better bargaining power of end users are likely to cut-deep into the profit margin of the market.

### Segmental Analysis

The global market of fatty esters by type, is segmented into medium chain triglycerides (MCT), glyceryl monostearate, isopropyl palmitate, polyol esters, sucrose esters, and glycol esters. The market by application, is segmented into personal care products and cosmetics, lubricants, surfactants, food, and others. The large-scale application of fatty esters is likely to push the global fatty esters market growth. Fatty esters have high surfactant property, hence is noted to be the main ingredient for detergents. The flourishing consumer goods industry, of which detergent is a prominent segment, is likely to favour the fatty ester market.
