Nomadic herding involves rearing of animals on natural pastures and is generally performed by people of the arid and semi-arid regions. People stay with their animals looking for natural pastures for their livestock to graze. Livestock farming is a farming system, where the major focus laid is on rearing animals. Unlike nomadic herding, the lives of the farmers are settled. Livestock farming has developed a commercial basis in areas where large plots of lands are in abundance for animal grazing. Low rainfall areas of Australia, North America, and South America are ideal for this kind of farming. Shifting cultivation is often embraced in the tropics. The land is generally obtained by clearing forest areas, using slash and burn techniques. The land is cultivated until its fertility declines. Farmers then shift to other areas of the forest for cultivation. Due to tremendous pressure by the industrialists, this farming system is declining at a rapid pace.

## Major Key Players

Anderson Hay  
ACX Global  
Adahra Fagavi  
Barr-Ag  
Standlee Hay  
Western Timothy Hay  
M&C Hay

## Global Timothy Hay Market Segmentation

Segment by Type
