

Allergy Vaccine Market Overview by 2025 | Circassia, Cytos Biotechnology AG, Merck & Co., Stallergenes Greer.

The report is a comprehensive presentation of trends, forecast and dollar values of global allergy vaccine market.

PUNE, MAHARASHTRA, INDIA, October 24, 2019 /EINPresswire.com/ -- Infinium Global Research has added a new report on "[Allergy Vaccine Market](#) (Allergy Type - Allergic Asthma, Peanut Hypersensitivity, Seasonal Allergic Rhinitis, Grass Pollen Hypersensitivity, Tree Pollen Hypersensitivity, Cat Dander Allergy, and Other Allergy Type; Vaccine Type - Cat Allergy Vaccine, Peanut Allergy Vaccine, House Dust Mite Allergy Vaccine, Injectable MPL Allergy Vaccine, Ragweed Allergy Immunotherapy Vaccine, and Other Vaccine Type): Global Industry Analysis, Trends, Size, Share and Forecasts to 2025". An allergic reaction occurs when cells in the immune system interpret a foreign substance or allergen as harmful. The immune system overreacts to these allergens and produces histamine, which is a chemical that causes allergy symptoms, such as inflammation, sneezing, and coughing. Allergic reactions can range from mild to severe. In some severe cases, allergies can trigger a life-threatening reaction known as anaphylaxis. The allergy vaccine market is anticipated to expand at a CAGR of 4.2% from 2019 to 2025.

Growing Research and Development Activities for the Development of Allergy Vaccines

Spared of allergic conditions can be seen all over the world and the demand for its drug is increasing at a tremendous rate. This growing prevalence of allergy disease is one of the major contributors to the growth of the market. Considering the stats published by AAFA more, than 50 million Americans have experienced various types of allergies each year and so it has become the 6th leading cause of chronic illness in the United States. moreover, a recent study published by World Allergy Organization (WAO) Allergies and related diseases including asthma, rhinosinusitis, atopic dermatitis and life-threatening food, drug, and stinging insect allergies

affects at least 30% of the population and nearly 80% of families. Furthermore, growing research and development activities for the development of allergy vaccines are also contributing to the growth of the market. On the other presence of limited manufactures and hand, high costs associated with the vaccines can hamper the growth of the market. However, growing awareness about the allergy disease and their treatment among the people globally will provide a better opportunity for the growth of the market in the forecast period.

Allergy Vaccine Market: Segmentation

The allergy vaccine market can be segmented by allergy type and vaccine type. Based on allergy type the market can be further classified into allergic asthma, peanut hypersensitivity, seasonal allergic rhinitis, grass pollen hypersensitivity, tree pollen hypersensitivity, cat dander allergy, and others. Among these seasonal allergic rhinitides dominates the market owing to its increasing prevalence, worldwide allergic rhinitis affects between 10% and 30 % of the population. Furthermore, based on the vaccine type the market can be divided into cat allergy vaccine, peanut allergy vaccine, house dust mite allergy vaccine, injectable MPL allergy vaccine, ragweed allergy immunotherapy vaccine and others.
