During the forecast period between 2017 and 2022, the DIY Home Automation Systems market is expected to hit USD 79.57 billion by 2022, at a CAGR of 11.3 percent. This market's growth is driven by cost-reduction initiatives allowed by home automation systems, the emergence of a significant number of manufacturers increasing their consumer offerings, and the rising importance of mobile home surveillance. The television management market is expected to have the largest share in the home automation platform industry among different product categories.

During the forecast period, the innovative solutions segment is expected to hold the largest market share. The innovative approaches were designed specifically to allow consumers identify energy trends and take meaningful action to reduce their consumption. These are highly beneficial as they can also give guidance messages to end users to take the necessary action to reduce power and then monitor the electronic devices based on the actions of the consumers.

Major Key Players:
