

Colorectal Cancer Market Analysis, Strategies, Segmentation and Forecast to 2019 - 2025

WiseGuyReports.com Presents "Global Colorectal Cancer Market Size, Status and Forecast 2018-2025" New Document to its Studies Database

PUNE, MAHARASTRA, INDIA, October 22, 2019 /EINPresswire.com/ -- The increasing number of incidences and the heavy pricing of drugs attracted pharmaceutical companies to invest in this sector. Even some surveys stated that the cost-benefit ratio of Bowel cancer is highest in the industry. Extensive research and development are expected to reduce the cost of the treatment and make the drugs

accessible to everyone. Diarrhea, loss of appetite, a lump in the back passage, pain in the abdomen, blood in feces, vomiting, fatigue, constipation, loss of weight, vomiting, fatigue, nausea, and iron deficiency are some of the symptoms associated with [Colorectal Cancer](#).

Colorectal cancer is a type of cancer, which develops from rectum or colon, so it is also known as colon cancer and bowel cancer. Bowel cancer starts from the large intestine region, which is in the lower part of the digestive system. The initial phase of Colorectal Cancer is called adenomatous polyps, where it started to develop small clusters of cells in the intestine. If adenomatous polyps are not treated properly, it will result in bowel cancer. So, it is always recommended to screen the adenomatous polyps regularly to prevent cancer.

Blood in stool and changing bowel habits are the basic symptoms of Bowel cancer. Bowel cancer is extensively seen in countries like the United States. According to a study, bowel cancer is the third most diagnosed cancer while it stands at number two in terms of leading to cancer in the United States.

According to a study, the Colorectal Cancer drug market is anticipated to reach 10.8 billion by 2022. The industry is expected to show an impressive Compound Annual Growth Rate (CAGR) of 3.3% by 2022.

Major Key Players:

Roche
Debiopharm
