

# 3D Mapping & 3D Modelling Market 2019 : Discovers the Opportunities,Trends,Risk,Simulation,Management to 2023

PUNE, INDIA, October 25, 2019  
/EINPresswire.com/ --

WiseGuyReports.Com Publish a New Market Research Report On –“ [3D Mapping & 3D Modelling Market 2019](#) : Discovers the Opportunities,Trends,Risk,Simulation, Management to 2023”.

3D Mapping & 3D Modelling Market  
2019

Description: -

3D mapping & 3D modelling technologies are the most efficient and cost-effective ways to design and develop 3D environments in a highly demanding market. 3D mapping and modelling solutions can help graphic designers to quickly design 3D maps of the surroundings with utmost accuracy and clarity. 3D mapping & 3D modelling solutions can effectively plug into professional visualization procedures. 3D mapping & 3D modelling have entirely changed the way of graphic designing. Not only do 3D mapping & 3D modelling help end-users and designers visualize space requirements, but also enhances designing accuracy and efficiency. 3D mapping & 3D modelling provide graphic designers with the capacity to physically visualize how much real an object looks from different perspectives.

## Key Players

- Apple, Inc. (U.S.)
- Saab Automobile AB (Sweden)
- Airbus Defence and Space SAS (France)
- Google, Inc. (U.S.)
- Autodesk, Inc. (U.S.)
- Trimble Inc., (U.S.)
- Intermap Technologies (U.S.)
- Topcon Corporation (Japan)
- Cybercity 3D, Inc. (U.S.)
- Esri (U.S.)
- Applied EarthWorks, Inc. (U.S.)

- Aerolion (U.S.)
- Mitsubishi Motors Corporation (Japan)
- Udemy Inc. (U.S.)
- The Blender Foundation (the Netherlands)
- Pixologic, Inc. (U.S.)

When designing in 2D, the graphic designers require to build a separate plan and elevation view to discover the space requirements of an object, which consumes a lot of time. Using 3D mapping & 3D modelling, the design is accomplished in a single model. While mapping procedure is used by designers to develop 3D views of objects, 3D modelling solutions helps designers to build a perfect 3D model of the desired object with the help of specialized tools and software. 3D modelling techniques include splines, patches, polygonal modelling, primitive modelling and Non-uniform rational basis spline modelling.

Advanced 3D mapping & 3D modelling procedures are utilized in different applications across various industry verticals, including automobile, construction, transportation, entertainment and healthcare. In the automation industry verticals, 3D mapping & 3D modelling procedures are utilized to design automobiles including trucks and cars. Also, in the healthcare sector, 3D mapping & 3D modelling solutions are used to research medicines and study the human body, as these solutions offer an enhanced view of the body parts. 3D mapping & 3D modelling solutions are also utilized in the building & construction industry verticals to design a 3D view of any construction site or building.

#### Market Segmentation

The global 3D mapping & 3D modelling market can be analyzed on the basis of applications, major verticals, and regional markets.

Based on the applications, 3D mapping & 3D modelling market can be segmented into-

3D Mobile Mapping  
3D Projection Mapping  
3D Laser Mapping  
3D Texture Mapping

Based on industry verticals, 3D mapping & 3D modelling market can be segmented into-

Healthcare  
Retail  
Media and Entertainment

3D mapping & 3D modelling solutions are also used in Automotive, Defense, Transportation, and other industry verticals. In the entertainment industry, 3D mapping & 3D modelling procedures are utilized to develop animated models of games or movies and also to deliver an excellent virtual view of cinema. Advancements in animation technology and easy availability of 3D equipment such as scanners, sensors, and other GPS components are anticipated to drive the growth of 3D mapping & 3D modelling market.

#### Regional Analysis

North America, Europe, Asia Pacific, and the Middle East and Africa are the major regions driving the growth of 3D mapping & 3D modelling market. North America, on account of having a strong presence of automotive and entertainment industry, is expected to be the dominant market for 3D mapping & 3D modelling. North American automotive and entertainment industries are expected to offer potential growth opportunities to the regional and international market players. Other factors, such as technological advancements in automotive, healthcare, entertainment, and construction industries and increased demand for advanced modelling and designing tools are expected to drive the demand for 3D mapping & 3D modelling procedures. The Asia Pacific and Europe are other prominent markets for 3D mapping & 3D modelling.

#### Important Facts

3D Max Design software, an extensive 3D design, animation, modelling, and rendering solution for designers, architects, civil engineers, and visualization specialists, is attaining high prominence across the globe. The software involves several specialized tools and solutions that can help designers to develop excellent 3D environments and objects. 3D Max design can also be used to develop engaging 3D games and movies.

Complete Report Details @ <https://www.wiseguyreports.com/reports/3326837-3d-mapping-3d-modelling-market-research-report-global-forecast-till-2023>

#### Table of Contents – Major Key Points

- Executive Summary
- Scope Of The Report
- Market Research Methodology
- Market Landscape
- Industry Overview Of Global 3D Mapping & 3D Modelling Market
- Market Trends
- Global 3D Mapping And 3D Modelling Market By Application
- Global 3D Mapping And 3D Modelling Market By Verticals

Continued....

#### About US:

Wise Guy Reports is part of the Wise Guy Consultants Pvt. Ltd. and offers premium progressive statistical surveying, market research reports, analysis & forecast data for industries and governments around the globe.
