Overview

The Palm Kernel Oil is a derivation of the Kernel of the *Elaeis Guineensis*. The global crude palm oil is derived from the mesocarp of the palm crop and the kernel. The Palm Kernel Oil is primarily used in the process of cooking and turns into a semi-saturated vegetable fat when stored at room temperature. Palm Kernel Oil is more affordable than the other oils. The Palm Kernel Oil

It is stable at elevated cooking temperature and has a longer shelf life than many other vegetable oils. Palm Kernel Oil is primarily prepared for the preparation of ice-cream, butter, chocolate, ghee, and other dairy products. The Global food & beverage industry has been on the growing side with significant growth in the coming years. The change in food habits is likely to increase the food & beverage industry, which would be directly proportional to the increase in consumption of the cooking oil and is expected to boost the market of Palm Kernel Oil.
