

Chew on This: Mishawaka Dentist Cuts Need for Root Canals by 80%

Coulter Family Dentistry data analysis revealed 80% reduction in the need for root canals among their dental patients; credits reduction to advanced technology

MISHAWAKA, IN, UNITED STATES, November 4, 2019 /EINPresswire.com/ -- Coulter Family Dentistry of Mishawaka examined the data and noted a 80% reduction in the number of [root canals](#) performed on their patients over the most recent five-year period. Commenting on this, Dr. Brian Coulter, DDS said, "This is a significant reduction in the need for root canals that we credit to our use of some very advanced technologies as well as our expertise in applying these technologies and providing alternative treatment options."

Long known as one of the area's leading dental practices featuring a pain-free, IV [Dental Sedation](#) option, Coulter Family Dentistry provides a wide range of alternative procedures that have contributed to the reduction the need for root canals among their dental patients.
