Further, increasing awareness of the ill-effects of antibiotics on gut disruptions has highlighted the need for specific bacterial-targeted therapy for infectious diseases.

Global Human microbiome market, forecast to 2026, reveals strong demand across Americas

North America led the human microbiome market growth amidst key regional players characterized by intense government investments to support microbiome research, increasing prevalence of lifestyle diseases and growing consumption of probiotic products.

Moreover, awareness about the positive aspects of microbiome-based products and initiatives responsible for generating a holistic understanding of concepts like metagenomics and whole-genome sequencing are key factors driving the human microbiome market across the United States.

Key market vendors are participating in collaborations and new product line to explore market growth opportunities over the forecast till 2026

Ongoing collaborations and agreements between different industry players to support the human microbiome research, as well as launch of novel products are amidst human microbiome market growth strategies in focus by market participants.

For instance, the Seres collaboration in 2019 with AstraZeneca to focus on developing an automatous understanding of the microbiome for efficacy of cancer immunotherapy streamlines novel human microbiome products in the long term period. In addition, in 2018, Enterome entered into a co-development and co-promotion agreement with Takeda for its investigational drug candidate EB8018.

Further, following the post of launch of BiomeBliss, the primary prebiotic dietary supplement in 2018 by Microbiome Therapeutics, LLC specifically developed to support a healthy gastrointestinal (GI) microbiome is an example of latest market growth opportunities.

Companies including DowDuPont Inc., Enterome Bioscience, Ubiome, Inc., Seres Therapeutics, 4D Pharma PLC, Second Genome, Synlogic, Ferring Pharmaceuticals, Vedanta Biosciences, Inc., and Evelo Biosciences, Inc. are the key players contributing to the human microbiome market share.
