

# Insulated Glass Market 2019 Global Analysis, Size, Share, Growth, Trends & Forecast To 2025

*Wiseguyreports.Com Adds "Insulated Glass – Global Market Growth, Opportunities, Analysis Of Top Key Players And Forecast To 2025" To Its Research Database.*

PUNE, MAHARASTRA, INDIA, November 6, 2019 /EINPresswire.com/ -- Global [Insulated Glass](#) Industry Market Research Report.

## Report Overview:

The global insulated glass market is estimated at \$ 37.94 billion in 2015 and is expected to reach \$ 58.71 billion by 2021, with an average growth of 7.6% during 2016. This growth is primarily due to growth in the construction industry and increasing demand. There is also a global increase in demand for green buildings, high energy costs and strict government regulations. The construction boom, especially in developing countries, is increasing the demand for glass. This, in turn, increases the market demand. Increased disposable income, continued urbanization, improved living standards and increased vehicle sales also drive market growth.

In addition, the increased demand for thermal insulating glass to increase the thermal insulation of buildings and maximize indoor comfort will help the market to grow in the coming period. Of all types, double glazing is the fastest growing market at a cost. Value-added products, such as low-glazing, are used in double-glazed windows to enhance insulation. These products offer benefits such as low carbohydrate emissions and energy savings. Double-glazed insulated windows also have other benefits such as high thermal insulation, security, reduced furniture damage and limited condensation. Government regulations in Europe and North America stimulate industrial growth.

Of all the applications, non-building buildings are built on the fastest-growing market for two-pane windows. Non-residential buildings include commercial buildings, offices, hotels, hospitals, educational institutions, stadiums, etc. Construction. These buildings help reduce the burden of heating and cooling, manage the indoor climate, reduce noise and create a more durable outdoor building. Industrial growth is attributed to changes in building codes to improve energy efficiency.

## Major Key Players:

Duro-Last Roofing Inc  
Huntsman International LLC  
Owens Corning  
Dow Chemical  
Rockwool International  
Johns Manville  
Knauf Gips KG  
Certain Teed Corporation

Market segmentation:

In 2018, Asia acquired the largest share of insulated glass global market. Growing middle-class population, increasing disposable income and demand for sustainable construction contribute to market growth. The growth of the Pacific market is also contributed by the availability of the basic raw materials such as glass wool. The market segment for insulated glass is split into Argon Filled Insulated Glass Unit (IGU), Low-Insulated Glass Unit (IGU) and

Dual Seal Silicone Insulated Glass Unit (IGU).

Factors influencing growth prospects:

Industry in Germany is expected to grow due to the growing demand for green buildings. The demand for some government initiatives to reduce CO2 emissions from air-conditioned buildings is expected to increase. The main obstacle to product growth is the high cost of production. The material consists of frame, separators, inert and dried gases, which increases the cost of the product. Insulated glass manufacturers invest heavily in developing inexpensive products to increase their market share.

Main geographic areas:

The main areas of study of Insulated Glass are the United States, Europe, China, Japan, Southeast Asia, India and Central and South America, The Middle East and Africa, South America, China, Japanese, Europe and India.

The best players in the industry:

Among the leading manufacturers of insulated glass presented in this report are: Double insulated glass (GUI), IGU double glazing and Full Argon Glass Insulation Device (IGU).

Latest news:

The Asia-Pacific insulated glass market is currently being driven by energy efficiency policies of governments such as China, Japan and India.
