

Winter is Coming...Make Sure Your Heater is Working Properly this season

This article discusses some of the new service plans available by your local hvac company and also mentions great tips in keeping your equipment running strong.

LEVITTOWN, PA, UNITED STATES, November 8, 2019 /EINPresswire.com/ -- Its that time of year again, out with the warm weather and in with the cold. This winter season, HTR Mechanical is repairing heaters in Bucks County for tons of local residents in light of the colder nights. It is very important to maintain your HVAC system properly to avoid harmful side effects of faulty heaters including frozen or even broken pipes in your home. A simple HVAC tune up can go a long way this winter to keep your heater running smoothly. Did you know HTR Mechanical is a local licensed and insured HVAC service expert? They specialize in forced hot air installations, oil burners, gas heaters and even mini ductless split installations. This year, check out options to upgrade your system to a high efficiency HVAC unit. This could save you a lot of money in the rising cost of utilities.

Heating Service Tips

Don't forget the basics in simple HVAC maintenance this year. Change out your air filter monthly. If this is not easy for you to remember, you can set up a monthly HVAC tune up plan with HTR where one of their [heating and air conditioning service](#) experts will come out to your home and change out the filters, check refrigerant levels and make sure your system is up and running properly. Give them a call today at 267-798-5005 or check them out online for more information at www.HTRmechanical.com. From great service plans to affordable HVAC installations, look no further than these local Bucks County HVAC service guys.

“

Get your HVAC system tuned up this winter by HTR Mechanical LLC”
heating experts

Do you have an area in your home that just doesn't get enough heat? HTR has the perfect solution for older homes that don't have a well balanced or distributed heating system. Check out their mini ductless split systems which offer a great solution in providing heating and air conditioning service for rooms that may not have existing ductwork, or room to install new ductwork. These systems offer heating options as well as cooling options and work great in sun rooms, third floors and even some of the finished basement applications. For an economical

price, HTR can get your whole house conditioned constantly with a mini ductless split system.

Some of their other local HVAC services include heat recovery, [heater repair bucks county](#), heat recovery and air conditioning repair

Dry air this winter? Check out the [whole house humidifiers](#) HTR can add to your existing ductwork controlling the humidity in your house. These neat devices are powered by clean water that is conditioned in your air supply to help sooth some of that rougher dry air that isn't always as comfortable as we would like it to be.

□In conclusion, winter is almost here and HTR is booking appointments fast, so if you need HVAC service than call them today at 267-798-5005 to schedule your service.
