## Industry News:

Even though there has been a rapid growth of the global digital economy, there is a noteworthy disproportion among the development of the ICT sectors between developed and developing countries around the world. With the early adoption of digitally advanced technologies in developed countries, there has been significant growth in application industries of the ICT sector. Many developing countries, however, especially the underdeveloped countries, are not adequately equipped to evolve alongside global digitalization and are expected to witness a gradual growth in their ICT industries, owing to the lack of skilled professionals, scientific and technological advancements, slow economic growth and political unrest. This offers established companies in the ICT sectors of developed countries opportunities to expand their businesses to these regions and contribute to the global digitalization and economic expansion.
