X2 Group
Best Cold Chain
AIT
Crystal Logistic Cool Chain Ltd
ColdEX

There are numerous countries which are investing heavily in transporting the goods from the cold storage. The trade corridor is being extended for further development of the business. The refrigeration system is developed and practiced aiming to maintain the shelf life of the product and the quality of the product. For following the regulation for food safety, the vendor is required to perform several rules and regulations regarding the product storage. The internet of things plays a major role in manipulating the cold storage. The usage of the IoT (internet of things) can help to build the temperature sensitive warehouses in a large way. The internet of things enables the vendor to understand the current demand of cold storage in a particular region of the world.

The temperature controlled warehouse requires high power as well as many refrigerators causes the adverse effects to the environment. There are many modern technologies which enable the warehouse to consume less power for managing the refrigerators. The intelligent cold storage house automation can reduce the emission of zero energy to the environment. The consumption of less energy results the low expenditure for using the energy. The market of the global cold chain market has reached \$171900 million in the year of 2018, whereas it is expected to reach \$412400 million by the year of 2024. The annual compound growth rate of the market is 15.7%.
