Segmentations allow one to have a look at the industry from varying angles, with each aspect playing a critical role in the growth of the industry. This, thus, enables one to have a clear picture of the industry with an unbiased opinion on the same. Two of the significant factors based on which the industry can be segmented into are the product type and the application. Based on the product type, the industry is segmented into metal, non-metal, and composite material. On the other hand, based on the application, the industry is segmented into military & defense and law enforcement agencies.

## Regional Overview

When it comes to military helmet, North America leads the race, followed by Europe. Major nations include Germany, Israel, and others. On the other hand, the Asia Pacific region also shows some significant signs of growth with China leading the race. The aggressive war tactics by China have alarmed significant nations who have sought to expand their base in other countries too. India and Japan, on the other hand, so some vital signs of growth also.

## Industry News

The United States army secretly fielded a new variety of military helmet that is low weight and helps the soldiers guard against snipers. Other key features include light weight protection and anti-ballistic protection. The experiment was conducted in secrecy and was the brain child of Brg. Gen. Anthony Potts.
