While most of the tokens offered in IEOs are ERC20, Gleec Coin differs by being a [Bitcoin Fork](#) with its own blockchain working structure that has been active since January 2018. Telecommunications, technology development, e-

commerce and cryptocurrency trading focused products, all of them allied and transparent to each other, creating an ecosystem.

The first [Gleec Holding](#) outcome is Gleec Chat, an ultra-protected communications app supported by end-to-end encryption and military class VPN connection. The second one, Gleec BTC, launched in 2017, is an innovative cryptocurrency trading platform with its own chat channel. In 2019, Gleec Lab initiated a laboratory composed by tech experts, developers, researchers and technicians that make highly-innovative apps, websites and gadgets to happen.

In addition to these solutions, two other products are being developed: Gleec Market, a marketplace with Gleec Coin as its own native currency, and Gleec Pay, a platform with multiple tools in one service to ease money management and transactions.
