

Hadoop Operation Service Global Market Is Expected To Grow With A CAGR Of 40.0% In Forecast Period 2019-2025

A new market study, titled "Global Hadoop Operation Service Market By Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

PUNE, MAHARASHTRA, INDIA, November 15, 2019 /EINPresswire.com/

--

Hadoop Operation Service Market - 2019-2025

Hadoop Operation
Service Market -
2019-2025

Market Overview

Hadoop is a provisioning model offered to associations looking to consolidate a facilitated execution of the Hadoop stage. Apache Hadoop is an open-source programming stage that uses the MapReduce innovation to perform circulated calculations on different equipment servers. Hadoop-as-an administration (HDaaS) suppliers offer Hadoop PaaS, which empowers specialized specialists of ventures to perform different activities including huge information investigation, huge information the executives, and huge information stockpiling in a cloud.

The following manufacturers are covered:

Unravel
BlueData Software
WANDisco
AWS
Hortonworks Inc
Pythian Group Inc

This report provides comprehensive analysis of
Key market segments and sub-segments
Evolving market trends and dynamics
Changing supply and demand scenarios
Quantifying market opportunities through market sizing and market forecasting
Tracking current trends/opportunities/challenges
Competitive insights
Opportunity mapping in terms of technological breakthroughs

Hadoop Operation Service Market

The Hadoop Operation Service market is expected to grow at a CAGR of over 40%, during the forecast period (2019 - 2025). The scope of the report is limited to solutions offered by various market players from various end-user sectors including retail, IT & telecommunication, healthcare, banking financial services & insurance, government & defense, and manufacturing. The regions considered under the scope of the report include North America, Asia-Pacific, Europe, Latin America, and Middle East & Africa.

With the increase in the volume, velocity, and variety of data, companies are looking for means to analyze and process it as quickly and economically as possible. Considering the current state of big data, a tremendous amount of information is being generated every day in the form of heterogeneous databases. To cater this, the demand for cost-effective Hadoop big data solutions is increasing among the enterprises worldwide, as these solutions will help organizations to manage and analyze such huge datasets for understanding the trend and help in the decision making at the corporate level in real-time. With the advancement of this solution, data can be stored, evaluated, and extracted to meet the desired objective. It aids in improving the models of business and maximize the revenue of the vendors.

IT & Telecommunication Sector to Dominate the Market over the Forecast Period

The amount of data generated by telecommunication industry has high velocity and volume. In a hypercompetitive industry, telecommunication companies have to differentiate their offerings and target customers effectively, with the information collected about customer behavior and preferences. The application of Hadoop Operation Service in telecom sector creates opportunities for telecommunication companies by using the Hadoop framework in big data ecosystem by combining various real-time insights with the habits and preferences of the customer to achieve unparalleled marketing power.

The revenue model of Telecom sector has seen a marked shift from the traditional voice and messaging driven model to a data driven model. This churn in the industry has given rise to an enormous amount of data which has never been seen before. The integration of Hadoop in the telecom sector is in need for robust, scalable and accurate data analysis software, which is capable of tracking and analyzing such large volume communication in real time.

North America to Appear as one of the Leading Region in the Hadoop Operation Service Market

North America accounted for the largest share of the Hadoop Operation Service market. This growth can be attributed to the increasing deployment of Hadoop big data solutions by major IT enterprises such as Google, Microsoft, IBM, and Oracle in the region to enhance the efficiency and streamline their business operations. Companies of the region are spending heavily on R&D initiatives for developing integrated solutions that provide superior advantages by shifting their attention to Big Data as a useful means to derive insights from the huge amount of data generated from various sources. The Hadoop technologies in such databases frameworks are at the core of the solutions heralding a paradigm shift.

Customization of the Report

Value chain analysis

Consumer behavior analysis at country level

The report includes six parts, dealing with:

- 1.) basic information;
- 2.) the Asia Hadoop Operation Service Speaker Market;
- 3.) the North American Hadoop Operation Service Speaker Market;
- 4.) the European Hadoop Operation Service Speaker Market;
- 5.) market entry and investment feasibility;

6.) the report conclusion.

Table of Content:

1 Study Coverage

2 Executive Summary

3 Breakdown Data by Manufacturers

4 Breakdown Data by Type

5 Breakdown Data by Application

...

11 Company Profiles

12 Future Forecast

13 Market Opportunities, Challenges, Risks and Influences Factors Analysis

14 Value Chain and Sales Channels Analysis

15 Research Findings and Conclusion

16 Appendix
