

# Plant-sourced Emulsifier Market 2019, Global Industry Analysis, Size, Share, Growth, Trends and Forecast - 2024

*A New Market Study, titled "Plant-sourced Emulsifier Market Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.*

PUNE, MARKETERSMEDIA, INDIA, November 18, 2019 /EINPresswire.com/ -- Summary

A New Market Study, titled "Plant-sourced Emulsifier Market Upcoming Trends, Growth Drivers and Challenges" has been featured on WiseGuyReports.

This report provides in depth study of "Plant-sourced Emulsifier Market" using SWOT analysis i.e. Strength, Weakness, Opportunities and Threat to the organization. The Plant-sourced Emulsifier Market report also provides an in-depth survey of key players in the market which is based on the various objectives of an organization such as profiling, the product outline, the quantity of production, required raw material, and the financial health of the organization.

This market report offers a comprehensive analysis of the global Plant-sourced Emulsifier market. This report focused on Plant-sourced Emulsifier market past and present growth globally. Global research on Global Plant-sourced Emulsifier Industry presents a market overview, product details, classification, market concentration, and maturity study. The market value and growth rate from 2019-2025 along with industry size estimates are explained.

Key manufacturers are included based on company profile, sales data and product specifications etc.:

Archer Daniels Midland Company (U.S.)  
E. I. du Pont de Nemours and Company (U.S.)  
Cargill (U.S.)  
Kerry Group Plc. (Ireland)  
Ingredion Incorporated (U.S.)  
Corbion NV (The Netherlands)  
Lonza Group Ltd. (Switzerland)  
Palsgaard A/S (U.S.)  
Riken Vitamin Co. Ltd. (Japan)  
Beldem S.A. (Belgium)

## Market Overview

Plant-sourced emulsifiers are those compounds that can be obtained from different species of plants. Emulsifiers are substances that are used to increase the stability of a mixture of two or more immiscible liquids. They typically have a polar and non-polar part with the polar part being hydrophilic and the non-polar part is a hydrophobic end. This ensures that the polar part is more soluble in water while the non-polar part is less soluble. According to the type of emulsifier used, the hydrophilic part ensures that it is more soluble in water forming an oil-in-water emulsion

while the hydrophobic part gives a water-in-oil emulsion.

Plant-sourced emulsifiers have several benefits, they prevent the aggregation of residues on a surface and make the residue precipitate preventing deposition. Plant-sourced emulsifiers are used in a variety of different industries that range from the beauty to the food industry as a source of ensuring that the mixture does not get unstabilize by increasing its kinetic stability. The main emulsifier that is commonly used is beeswax that has various properties and is used in a wide range of solutions available.

The report published on the global plant-sourced emulsifier market counts the end industries and the product types in major regions around the world while also introducing the product types and regions. For key vendors from around the world, from the year 2013 to the year 2018 the market volume and market share are included to provide a better idea about the global market. Also, the global market profile and the vendor dynamics are included in the report to give both individuals and organizations interested in the plant-sourced emulsifier market a better idea and an introduction to it.

### Market Segmentation

The global plant-sourced emulsifier market can be divided into different market segments according to the different types of emulsifiers available that have been obtained from plants and the different industries that utilize them for different applications. The various types of emulsifiers that are listed in the report include Lecithin, Sorbitan Esters, and Stearoyl lactylates. Lecithin is one of the most common emulsifiers used and it can be obtained from a variety of different products. The different industries that use emulsifiers to prepare different types of products include the manufacture of bakery products, in confectionaries, manufacturing convenience foods, dairy products, and meat products.

### Regional Analysis

The world commercial plant-sourced emulsifier market can be split into different segments based on the region covered that include North America, Europe, South America, the Middle East, and Africa. The market growth for each region, as well as the regional market growth for key regions around the world, are included in the report. From the year 2019 to the year 2025 the market is forecast based on the various types of commercial plant-sourced emulsifiers sold, the applications that the plant-sourced emulsifier can be used for and based on the regions that the products are sold in. Key manufacturers from regions around the world are included and their sales methods are comprehensively analyzed.

### Major Key Points in Table of Content

1 Global Market Overview

2 Regional Market

3 Key Manufacturers

4 Major Application

5 Market by Type

6 Price Overview

7 Conclusion Fig Global Plant-sourced Emulsifier Market Size and CAGR 2013-2018 (Million USD)

Continued....

## Conclusion

The Global demand for Plant-sourced Emulsifier Market is forecast to report strong development driven by consumption in major evolving markets. Region wise government policy, market environment, competitive landscape, present trends in the market, technological innovation, upcoming technologies and the technical progress in related industry are all important factors impacting the growth of the market. Since more growth opportunities are expected to come up between 2019 and 2025 compared to a few years ago, it signifies the rapid pace of change and is safe to say that the Plant-sourced Emulsifier market development status and future trend is expected to be promising across the world.
