Recall that the Fast Shine service provides the services of on-site car wash without using water. The car wash order is carried out through a mobile application, orders are distributed among the washers according to the same model that Uber taxi service works - the order is received by the washer closest to the client and having a higher rating. The washing itself is carried out by special eco-friendly detergent compositions, the consumption of which for one car does not exceed 0.5 liters.

In 2019, the Fast Shine franchise was included in the Top 25 Best Franchises of the CIS countries according to Forbes.
