Global Biodetectors and Accessories Market is expected to reach \$15.2 billion by 2022. Continuous decline of environmental surroundings as a result of rising pollution and growing demand for technologically highly developed instruments are the factors driving the market growth. High cost of devices is the factor restraining the market. North America held the major revenue share of overall market followed by Europe. The Asia Pacific region is expected to witness profitable growth opportunities in future due to rising outsourcing actions and improving healthcare infrastructure.

Instruments held the major share of the products segment and accounted for more than 32% due to integration of broad variety of applications. Clinical application dominated the application segment and accounted for about 40% of overall industry. Defense segment is likely to show fastest growth due to increasing number of threats driving the demand for biodetectors and accessories. Point of care testing dominated the end-user segment as a result of increasing penetration of devices in medical analytics and rapid diagnosis of heart diseases through discovery of biomarkers.
