

# Drug Inventory Management Software Market 2019 Global Analysis, Opportunities and Forecast to 2024

*Wiseguyreports.Com Publish New Market Report On-"Drug Inventory Management Software Market 2019 Global Analysis, Size, Share, Trends and Growth, Forecast 2024"*

PUNE, INDIA, November 22, 2019 /EINPresswire.com/ --

## [Drug Inventory Management Software Market 2019](#)

### Market Overview

Drug inventory management software is extremely critical for the pharmaceutical industry. These software systems can track incoming orders and can efficiently manage usage and supply of stored medication. Also, drug inventory management software facilitates the pharmacist verification and billing-related complex procedures. The software tools are particularly concerned with the management of medication and drug inventory, and not the inventory of clinical equipment or instruments. They can be implemented either as dedicated software or in integration with other pharmacy management systems.

The following Major Companies covered in this report

CLIN1 Pharmacy

GuardianRx

PharmaTrader

McKesson Connect

Nuchange Pharmacy Management Solution

WinRx

JAC

Pharmacy Plus

SpineTrader

FSI

RS Software

Mukto Pharmacy Management

Clinical trial labs, hospitals, pharmacies, and healthcare systems are some primary end-users of the market that can leverage drug inventory management software to manage and dispense drugs, track commercial documentation and information, and decrease both medication waste and operation cost. The software market has huge growth potential as it caters to the needs of many areas of the pharmaceutical industry and clinical research institutions. The market report on the global drug inventory management software market highlights the competitive nature of this software market by delivering in-depth insights into the market's competitive landscape. The presence of several emerging and well-established players makes the market extremely robust.

The research report on drug inventory management software market demonstrates current and past market trends, market drivers, and market growth restraining factors. The market report also highlights some crucial opportunities, challenges, and threats that can affect the

performance of market participants. Increased demand for drug inventory management and the rising significance of service automation are some critical market drivers mentioned in the market report. The report also focuses on some potential challenges, such as the threat of substitute products and the threat of new market entrants, that can affect the growth of the market participants.

### Market Segmentation

The market report analyses the global drug inventory management software market on the basis of some crucial segments. The segments covered in the report are product types, dominant regional markets, applications, and market participants. Cloud-based software and web-based software are some primary types of drug inventory management software solutions discussed in the market report. The market report provides a detailed analysis of each product type based on product demand, product cost, revenue, market share, and growth rate. Large Enterprises and SMEs are the prominent application areas mentioned in the market report. The report provides comprehensive data regarding market participants, their company outlook, and the revenue, market share, and business development strategies of each company.

### Regional Overview

North America, Europe, Asia Pacific, South America, and the Middle East and Africa are the primary regional markets discussed in the market report and are expected to drive the growth of the global drug inventory management software market. All the above mentioned regional markets have been analysed on the basis of different critical factors, including regional product demand, regional drivers and restraints, and revenue, market share, and growth rate of each regional market. North America and the Asia Pacific, on account of having a large number of pharmaceutical industries and IT organizations, are expected to offer lucrative opportunities to the regional and external market players. The market report includes detailed information regarding market players operating in particular regional markets.

### Industry News

Merck KGaA, a German multinational company plans to use AI and machine learning to avoid inventory issues such as product shortage. The company says that it wants to shift from stockpiling medicines to predicting the demand by using a smart software. Merck has announced that it will use a software tool developed by TraceLink Inc.

### Table of Contents –Analysis of Key Points

- 1 Drug Inventory Management Software Market Overview
  - 2 Manufacturers Profiles
  - 3 Global Drug Inventory Management Software Market Competition, by Players
  - 4 Global Drug Inventory Management Software Market Size by Regions
  - 5 North America Drug Inventory Management Software Revenue by Countries
  - 6 Europe Drug Inventory Management Software Revenue by Countries
  - 7 Asia-Pacific Drug Inventory Management Software Revenue by Countries
  - 8 South America Drug Inventory Management Software Revenue by Countries
  - 9 Middle East and Africa Revenue Drug Inventory Management Software by Countries
  - 10 Global Drug Inventory Management Software Market Segment by Type
  - 11 Global Drug Inventory Management Software Market Segment by Application
  - 12 Global Drug Inventory Management Software Market Size Forecast (2019-2024)
  - 13 Research Findings and Conclusion
  - 14 Appendix
- List of Tables and Figures
