

Vembu Office 365 & G-Suite backup v2.0 BETA is now available

Vembu has announced the release of a reliable and easy-to-use backup & recovery solution to protect the critical user data in Office 365 & G Suite.

CARSON CITY, NEVADA, UNITED STATES, November 22, 2019 /EINPresswire.com/ -- Vembu, one of the leading Backup and Disaster Recovery solutions provider, has recently announced the release of the BETA version of their Office 365 and G-Suite backup v2.0(On-Premise and Cloud).

With this release, businesses will now be able to backup the Office 365 & G Suite data - email, calendar, contacts, and drive to their local storage (using the On-premise installer) and to the Vembu Cloud (using Vembu SaaS backup) as per their requirement.

The latest release is packed with enhanced features with a completely fresh user interface. Some of the mentionable new features are

- Support for OnPremise deployment

- File retention to retain multiple versions of the backed-up file

- OneDrive backup support for all Office 365 users under the domain account, while the previous version provides backup support only for the tenant admins
