

# Epiomic Epidemiology Series: Cervical Cancer Forecast in 22 Major Markets 2016-2026

*New Market Study, Report "Cervical Cancer Market 2019 Global Industry Demand, Opportunities, Growth Drivers, Challenges, Strategies and Forecasts 2025" Added.*

PUNE, MAHARASHTRA, INDIA, November 25, 2019 /EINPresswire.com/ --

Project Portfolio Management (PPM) Software Market - 2019-2025

## Market Overview

The project management software market is expected to register a CAGR of 10.17% during the forecast period (2019 - 2025). As today's corporations increase in size and complexity, an all-inclusive solution is needed to manage and coordinate an entire organization's portfolio of different projects. These solutions help the management to shuffle between plans, workload, budgets, and resources, carefully observe the project progress and report on delivery success.

Project management software (PMS) has now evolved into a strategic function of today's business due to the accelerating pace, technological advancements as well as the digital transformation and disruption happening across almost every industry Like jira portfolio, Gartner.

The PMS market is witnessing the presence of third-party technological and innovative accelerators that has given rise to new business models, engaging with customers and fulfilling their needs, and operationalizing business processes.

Project management today has also transformed into a means of new product development, owing to the emergence of the Internet of Things and the adoption of agile NPD, which has now merged with PMS and has led to the development of new firms like UMT360, GenSight, and Decision Lens in the field of enterprise product creation.

This report comes With PPM Software Market Research Projection By Technology, management, Services, Solution, Tool, Venture Capital Product, Application Forecast To 2025

## Scope of the Report

Project management software is a software which is used for various purposes in a project, such as planning, scheduling, resource allocation, and change management. It allows project managers, stakeholders, and users to control costs and manage budgeting, quality management, and documentation and can also be used as an administration system.

This report provides comprehensive analysis of

- Key market segments and sub-segments
- Evolving market trends and dynamics
- Changing supply and demand scenarios
- Quantifying market opportunities through market sizing and market forecasting
- Tracking current trends/opportunities/challenges
- Competitive insights
- Opportunity mapping in terms of technological breakthroughs

## Key Market Trends Of PPM Tool :

### Oil and Gas Segment to Witness High Growth

Project management software enables the oil and gas industry to plan, implement, monitor progress, close, and evaluate oil and gas projects, be it for the present or the future scenario. Moreover, due to the increasing complexity of the operations in the industry, there is a growing demand for project management software to properly optimize the utilization of resources, track the capital expenditure, expansion into new markets or for large oil and gas exploration, and production activities.

The software can also be implemented to manage and foresee risks associated with various projects which will enable cost reduction, increase productivity, and enhance the safety of the workforce.

The growing adoption of automation in the sector and the growth of a connected ecosystem in the oil and gas industry have further buoyed the adoption of PMS with the need for collaboration, mobility, workflow, and analytic functions.

With the rising oil production across the globe, it is evident that the need for fuel is rising and

hence will initiate new projects in the industry, which is further driving the project management software market in this segment.

#### North America Occupies the Largest Market Share

The North American region holds the largest market share due to the increasing number of enterprises adopting project management software solutions. The increasing demand among organizations to efficiently track and manage their projects is fueling this software demand in this region.

The usage of systems for task management for the successful execution of tasks and flexible work planning is anticipated to further drive the market in the coming years.

Additionally, the increased focus of organizations to promote collaborations among the workforce and boost the team's efficiency is also driving market growth.

Moreover, the introduction of technologically advanced enterprise solutions by small players is likely to boost the market growth. For instance, Victory Square Technologies in December 2018 launched Tim a real-time resource management software, which is an AI-based solution.

#### Competitive Landscape

The project management software market is very competitive in nature. The market is mildly concentrated because of the presence of many small and large players. The key strategies adopted by the major players are mergers and acquisitions and product innovation to stay ahead of the competition and to expand their global reach.

The study is a source of reliable data on:

Market segments and sub-segments

Market trends and dynamics Supply and demand

Market size Current trends/opportunities/challenges

Competitive landscape

Technological breakthroughs

Value chain and stakeholder analysis
