[Sports Hand Gloves Market 2019](#)

Market Overview:

Sports hand gloves are protective gear worn by players and fitness enthusiasts. These thick and padded leather coverings for hands have separate sections for the fingers and the thumb. Gloves protect a player's palm and fingers from injuries, offer a better grip and improve performance. With the growing enthusiasm towards fitness activities and sporting events, the global market for sports gloves is expected to grow at a good pace over the forecast period. As per reports, the market should grow by US\$ 317.69 million during 2018-2022.

Many countries have introduced development programs to encourage young people and increase their participation in different sports and events. Grassroots programs in schools, communities, and clubs are also helping in forming the core values of sports among people, thereby encouraging them to join sports and become regular players. These important factors have increased the demand for hand gloves among players in many countries around the world.
