

2022 Forecast Report on ERP Software Market Share, Size, Trends and Overview

The Business Research Company announces addition of new report Enterprise Resource Planning (ERP) Software Global Market Report 2019 to its research database.

LONDON, GREATER LONDON, UK, November 27, 2019 /EINPresswire.com/ -- The global [ERP software market](#) is expected to grow to \$105.26 billion at a rate of about 8.2% through 2022. Increased need for bringing efficiency and transparency in business operations is expected to benefit the enterprise resource planning software market in the forecast period as ERP enables the integration of high volume of data among several departments and manages the flow of information and communication throughout the organization. Increasing number of cyber-attacks are expected to limit the growth of companies in the enterprise resource planning software market during the forecast period.

The global ERP software market was valued at about \$76.8 billion in 2018 and is expected to grow to \$105.26 billion at a CAGR of 8.2% through 2022.”

Abdul Wasay

Increased need for bringing efficiency and transparency in business operations is expected to benefit the enterprise resource planning software market in the forecast period as ERP enables the integration of high volume of data among several departments and manages the flow of information and communication throughout the organization. Increasing number of cyber-attacks are expected to limit the growth of companies in the enterprise resource planning software market during the forecast period.

ERP software helps to connect the various departments in a business for the smooth flow of communication and information by providing a central database. This central database is a shared database which gathers, stores, analyzes and interprets data, allows any department to retrieve required information at any time, and supports multiple departments with ease.
