Global Surface Computing Market Analysis By Manufacturers, Regions, Type And Application, Forecast To 2024

PUNE, MAHARASHTRA, INDIA, November 27, 2019 /EINPresswire.com/ -- [Surface Computing Industry](#)

Description

The Global Surface Computing market is projected at \$17 billion in 2014 with a CAGR of 5.85% it is poised to reach \$26.8 billion by 2022. Implementation of Natural User Interface (NUI) and increase in companies revenue due to the adoption of multi-user surface computers are the key factors driving the market growth. Whereas, the high cost of surface computers and the inadequate availability of features with regards to surface computing systems are inhibiting the market growth. Increasing use of surface computers for corporate purposes and applications in hospitality & entertainment sectors are expected to provide growth opportunities in the coming years.

Some of the important features of surface computing include multi-touch and multi-user technology, which helps in identifying physical objects through touch. It uses natural user interface (NUI) to interact with users, thereby improving the user's experience of digital content through natural gestures, touch, and physical objects. North America accounted for the largest share of more than 30% of the surface computing market in 2014.

The flat display segment has major share of the market and accounted for more than 90% in 2014. The market for three dimensional based surface computing systems is expected to grow at a high CAGR of more than 40% during the forecast period. Hospitality and retail segments hold a major share in the surface computing market. The hospitality segment of the market is expected to grow at the highest CAGR of around 35% during the forecast period.
