Overview

Scaffolding refers to arranging the non-changeless structure to aid workers/ labourers in development, transport building, oil and gas, and different ventures that require building & development work. Scaffolding and accessories include various tools like aluminium poles, telescoping planks, and protective nets. Over 80% of the scaffolding expense goes to introducing, disassembling, and transport of scaffolding items. Increased use of lightweight scaffolding aids revenue generation due to its transportation productivity benefit.

The global scaffolding and accessories market is expected to grow rapidly, owing to the growing adoption of these tools across various sectors. These tools help workers carry out construction and building activities with ease when working at heights. Latest developments in scaffolding and accessories include narrow and wide span scaffolding that can be between 4 to 10 feet in length. Increased adoption of guardrails and toe boards also attribute to the overall market growth.

Further, easy operation, better durability, and energy efficiency contribute to rising market demand. Scaffolding and accessories are becoming increasingly popular due to growth in industrialization and urbanization, customer preference for sophisticated features, advances in technology, and increased construction activities. Manufacturers have also found better investment opportunities which further boost the market demand. Better investment for improving construction & infrastructure propels market growth.

The global scaffolding and accessories market is predicted to reach 78.4 billion by 2026, at a CAGR of 6.1%.

Segmentation

The global scaffolding and accessories market can be segmented on product type and application. Based on product type, the market can be segmented into facade access scaffolding and accessories, and tower scaffolding and accessories.

On the basis of application, the market is segmented into industrial construction, commercial buildings, and residential constructions. Of these, the commercial sector holds the largest market share due to the growing demand for self-owned houses.

Regional Analysis

Geographically, the market can be segmented into North America, Europe, and Asia Pacific. North America has the largest contribution to the market share due to the prevalence of leading manufacturers, growing adoption of scaffolding applications, and awareness among the end-users for the use of efficient accessories. Europe also has a major market contribution with better growth opportunities in the region.

Asia Pacific is an emerging market for scaffolding and accessories and is expected to grow rapidly in the forecast period. India, China, and Japan are the most dominant markets in the region due to improving government subsidies and aids, which boosts infrastructure activities in the regions. Growing demand for modular housing projects, the requirement for housing for a

growing population are some factors that will further contribute to the market share.
