The various applications and software solutions are available these days, making it easier for the customers to have a safe and comfortable ride with the inclusion of improved features such as tracking, coordination and pre or post-payment options. With the advent of the new app-based technologies, the transportation business is gaining popularity and presently is in the advanced stage. Taxi & Limousine Software makes it easier to rent or book a taxi or limousine for professional or personal use at any time of the day.

The global taxi and limousine software market report values the product market for 2018 and depicts a rise in the market share and size during the forecast period 2019 to 2024. The highly competitive landscape of the taxi & limousine software market and the participation of both big and small key players are expanding the market. The report also studies the top players in the global market, the company profiling and categorizes the market into different segments.

Market Segmentation

Based on type, the global taxi & limousine software market has been divided into-

Cloud-Based taxi & limousine software

Web-Based taxi & limousine software

The cloud-based taxi & limousine software segment provides a lot of convenience to the taxi and limousine software companies from deployment to reporting. It also helps in managing and accessing business and customer data from any corner of the world. The applications, services, or resources provided by the companies are made available to the user on demand through the internet from a cloud computing service provider. The accessible mobile applications, scheduling and tracking systems, free calculation and route optimization, and various payment gateways are provided by the above-mentioned cloud and web-based software. And on the basis of application, the product market has been segmented into SMEs and Large Enterprises.

Regional Overview

The rising connectivity and the global demand for transportation due to the increase in population and pollution are also rapidly increasing the need for taxi and limousine software. Countries like Japan, China, India, United States, UK, France, Italy, Germany, Mexico, Canada, Brazil, Colombia, Argentina, UAE, Nigeria, Egypt, Saudi Arabia, and South Africa are among the developed and developing markets for the taxi and limousine software. The key companies in these countries are launching and creating various attractive strategies to attract the customer by providing discounts, sales, and free coupon codes to increase the share and market size of the companies in the field of taxi & limousine software.

Industry News

Limo Anywhere, a transportation software solutions provider, hosted a Limo Anywhere Academy, a first-ever user conference in Texas to empower its customers to use the software to the fullest extent by providing advanced and immersive on-site training. The survey of nearly 5,000 customers was conducted that revealed the demand for the conference.
