Auto Injectors Market - 2019-2026

Market Overview: Auto Injectors
The global auto-injectors market size was evaluated at USD 767.7 million out of 2018 and is foreseen to show a CAGR of 19.5%. Increment in predominance of anaphylactic shock, ascend in mindfulness about these gadgets and inclinations of patients to pick self-administration of injections are the key elements moving the general market.

Auto-injectors are favored over regular gadgets as they empower proficient and improved drug delivery just as new formulations. Mechanical headways in items are foreseen to support development. For example, Humira by AbbVie, Inc. accompanies lock function and infusion start and end alerts

The use of auto-injector has brought many benefits for both the patient and healthcare professional. It has simplified self-administration, reduced anxiety, improved safety, and improved compliance. For instance, most of the currently available disease-modifying therapies available in the market for the treatment of multiple sclerosis are administered through injection. This has always been considered as a source of fear for a large number of patients and a considerable cause of non-adherence to treatment. Auto injectors can address this issue by ensuring that the injection is made at the accurate depth and can distinctly improve the comfort and tolerability of administration when compared to manual syringes. Data from various clinical trials support the use of auto injectors presenting that they improve adherence and the smaller gauge needles significantly reduce injection discomfort.
