

Digital Transaction Management (DTM) 2019 Global Opportunities And Industry Analysis Forecasts To 2024

digital transaction management market will grow nearly \$34.4 billion by 2023 with a compound annual growth rate (CAGR) of 23.3% for the period of 2018-2023.

PUNE, MAHARASHTRA, INDIA, December 4, 2019 /EINPresswire.com/ -- [Digital Transaction Management \(DTM\) Industry](#)

Description

The global Digital Transaction Management (DTM) Market is projected to reach USD 10,528.2 million by 2026, according to a new research published by Polaris Market Research. Digital transaction management is method of transforming traditional document-based processes to digital/electronic platform. In 2017 the electronic signatures solution segment dominated this market and in terms of regions North America is observed to be the leading contributor in the global market.

This study includes a detailed analysis of key trends and geographic information regarding the DTM market and its various segments. It also provides global market size, compounded annual growth rates (CAGR) and revenue prospects for various segments and sub-segments through 2023. The DTM market is segmented based on service type: e-signatures, workflow automation, document sharing and archiving, and security and authentication. The scope also includes the market size of e-signature software for both on-premises and cloud-based subscriptions, and it also considers the vendors such as Box, Google Drive and others who provide storage, team collaboration and workflow automation solutions.

The market is also segmented by deployment of DTM devices in various operating environments. Further, it is segmented based on adoption among end-user types including consumers and small, medium and large businesses. The study is primarily aimed at an analysis of the major application areas of DTMs across North America, Europe, Asia-Pacific, and the rest of the world (RoW) and by verticals such as government, BFSI, retail, healthcare, education, and supply chain and logistics.
