“

The global veterinary parasiticides market was valued at about \$9.63 billion in 2018 and is expected to grow to \$12.02 billion at a CAGR of 5.7% through 2022.”

Abdul Wasay

LONDON, GREATER LONDON, UK, December 5, 2019 /EINPresswire.com/ -- The global veterinary parasiticides market is expected to grow to \$12.02 billion at a rate of about 5.7% through 2022. The animals are increasingly being affected by zoonotic pathogens which are the leading cause for foodborne diseases worldwide. Zoonotic diseases are infectious diseases caused by bacteria, viruses and parasites, especially Salmonella and Campylobacter, which can be transmitted directly or indirectly between animals and humans. The necessity to curb these infections in animals drives the market for veterinary parasiticides. Lack of awareness about animal diseases

due to limited information on microbes and their impact on wildlife and livestock disease restrains the [veterinary parasiticides industry](#).

Veterinary parasiticides industry includes establishments that produce a cure to parasitic diseases that can be caused by helminths, amoeba, ectoparasites, parasitic fungi, and protozoa. Veterinary parasiticides are chemical substances that destroy or inhibit micro-organisms or parasites and improve the animals' health.
