

Guardian Jet Launches Free Aircraft Cabin Comparison Tool

Guardian Jet LLC has launched an Aircraft Cabin Comparison Tool on its website to help users compare floor plans and cross-sections for 80+ aircraft models.

GUILFORD, CT, UNITED STATES, December 5, 2019 /EINPresswire.com/ -- [Guardian Jet](http://GuardianJet.com) LLC (guardianjet.com), the aircraft brokerage, appraisals and consulting firm, today announced the addition of an [Aircraft Cabin Comparison Tool](#) to both its website and Vault client portal. The highly anticipated new tool provides graphically illustrated floor plans and aircraft cross-sections that enable viewers to compare, side-by-side, more than 80 aircraft models.

Guardian Jet Managing Partner Mike Dwyer noted that the new tool will be an enormous help to company clients, helping them make more informed decisions about their aircraft purchases. “Guardian Jet is an airplane broker, but we’re also in the information business,” Dwyer said. “This new tool will help our clients narrow down their options based on their needs, and help them research, gather data and conduct due diligence, all in one place. There’s no need to visit various aircraft manufacturer sites with disparate data ... we’re a one stop shop.”

“

This new tool will help our clients narrow down their options based on their needs, and help them research, gather data and conduct due diligence, all in one place.”

Mike Dwyer, Managing Partner, Guardian Jet

Dwyer also commented that the tool was carefully designed for its “user friendliness.” “Even a novice will be able to easily and quickly understand how to manipulate

it,” he said.

Using the Aircraft Cabin Comparison Tool, users will be able to:

- Compare two airplane makes and models side-by-side, and view the size differences.
- Lay one cross section on top of another to gain an even better visual understanding of size differences.
- See the cabin sizes in overlay format, to gauge and compare an average passenger’s height in relation to the cabin roominess.
- Review a sample floor plan to understand the exact configuration and how many passengers each aircraft can seat comfortably.
- Compare the floor plan layouts to determine the difference in space and layouts.
- Determine the number of passengers that can be comfortably boarded.

The Aircraft Cabin Comparison Tool joins Guardian Jet's suite of online tools, including:

- Aircraft Comparison – Compare up to three aircraft models and review each model's technical, performance, financial and operational aspects.
- Create a Budget – Determine the cost to buy and fly with an automated cash flow projection, based on your individual requirements data and/or Guardian Estimate™.
- Range Rings and Range Maps – Compare the flight ranges of up to three aircraft makes and models from airports worldwide.
