The global dental surgical devices and equipment market is expected to grow to \$5.81 billion at a rate of about 6.0% through 2022. The rise in dental diseases coupled with the rising demand for cosmetic dentistry is expected to drive the market in the forecast period. However, high costs

associated with dental surgical procedures such as implants, periodontal surgery, root canal, laser whitening along with less favorable reimbursement policies are the factors which may hinder the growth of dental surgical devices market.

Dental surgical devices and equipment are used for the treatment of problems related to dental caries, cavities, tooth decay, periodontitis, gingivitis, oral candidiasis, xerostomia, and other forms of oral cancers and injury. This includes examination instruments, retractors, dental hand-pieces, dental lasers and others. This market does not include therapeutic dental equipment, general dental devices and equipment and dental diagnostic imaging devices and equipment.
