The global [cell culture consumables and equipment market](#) is expected to grow to \$11.02 billion at a rate of about 9.9% through 2022. With the rising incidence of chronic diseases, there is an increased need for such equipment that can produce new cells outside the natural environment, driving the growth for this market.

Contamination of cell cultures is the most prominent factor that is restricting the growth of the cell culture consumables and equipment market.

Cell culture consumables include sera, media, reagents, and equipment such as bioreactors, cell counters, filtration systems, centrifuges, and incubators. The services include only installation and maintenance services offered by equipment manufacturers. Cell culture consumables and equipment are designed to aid scientists in growing new cells in culture media for drug development, tissue culture, and engineering, gene therapy, vaccine production and toxicity testing.

The global cell culture consumables and equipment market is further segmented based on type and geography.

By Type - The cell culture consumables and equipment market is segmented by application into vaccination, toxicity testing, cancer research, drug screening and development, recombinant products, stem cell technology, regenerative medicine, and others.

By Geography - The global cell culture consumables and equipment is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, the North America cell culture consumables and equipment market accounts for the largest share in the global cell culture consumables and equipment market.

Trends In The Cell Culture Consumables And Equipment Market

Companies in cell culture consumables and equipment are investing more in 3D cell culture for its new and advantageous features. 3D cell cultures are more relevant with a higher degree of structural complexity, and maintain the steady state for more time as compared to 2D cell cultures.

Potential Opportunities In The Cell Culture Consumables And Equipment Market

With increase in economic growth, health reforms, and increasing awareness about healthcare, the scope and potential for the global cell culture consumables and equipment market is expected to significantly rise in the forecast period.

Major players in the market are Becton Dickinson, Corning Incorporation, Eppendorf, GE Healthcare and Merck KGaA.

Cell Culture Consumables And Equipment Global Market Report 2019 is one of a series of new reports from The Business Research Company that provides cell culture consumables and equipment market overviews, analyzes and forecasts cell culture consumables and equipment market size and growth for the global cell culture consumables and equipment market, cell culture consumables and equipment market share, cell culture consumables and equipment market players, cell culture consumables and equipment market size, cell culture consumables and equipment market segments and geographies, cell culture consumables and equipment market trends, cell culture consumables and equipment market drivers and cell culture consumables and equipment market restraints, cell culture consumables and equipment market's leading competitors' revenues, profiles and market shares. The cell culture consumables and equipment market report identifies top countries and segments for opportunities and strategies based on market trends and leading competitors' approaches.

Where To Learn More

Read Cell Culture Consumables And Equipment Global Market Report 2019 from The Business Research Company for information on the following:

Markets Covered: global cell culture consumables and equipment market

Data Segmentations: cell culture consumables and equipment market size, global and by country; historic and forecast size, and growth rates for the world, 7 regions and 12 countries

Cell Culture Consumables And Equipment Market Organizations Covered: Becton Dickinson, Corning Incorporation, Eppendorf, GE Healthcare and Merck KGaA

Regions: Asia-Pacific, China, Western Europe, Eastern Europe, North America, USA, South America, Middle East and Africa.

Time Series: Five years historic (2014-18) and forecast (2018-22).

Other Information And Analyses: PESTEL analysis, cell culture consumables and equipment market customer information, cell culture consumables and equipment market product/service analysis – product examples, cell culture consumables and equipment market trends and opportunities, drivers and restraints, key mergers and acquisitions, key metrics covered: number of enterprises, number of employees, global cell culture consumables and equipment market in 2019 - countries offering most new opportunities

Sourcing and Referencing: Data and analysis throughout the report are sourced using end notes.

Strategies For Participants In The Cell Culture Consumables And Equipment Industry: the report explains a number of strategies for companies in the cell culture consumables and equipment market, based on industry trends and company analysis.

Opportunities For Companies In The Cell Culture Consumables And Equipment Sector: The report reveals where the global cell culture consumables and equipment industry will put on most \$ sales up to 2022.
