The global orthopedic prosthetics market is expected to grow to \$1.23 billion at a rate of about 2.8% through 2022. The orthopedic prosthetics market is being driven by an increasing number of trauma cases and accidental injuries. However, it is being restrained by entry barriers due to

guidelines by the FDA's regulatory control over these devices based on the risks associated with them.

Orthopedic prosthetics are artificial devices used to replace a missing body part lost due to disease, trauma, surgical removal of body appendage, disabling illness or congenital conditions. Orthopedic prosthetic devices are segmented into upper and lower extremity prosthetics. Upper extremity prosthetics include hand, elbow, shoulder, and lower extremity prosthetics include foot and ankle, knee, hip.
