

Ni2 partners with Worldwide Supply to offer a new generation OSS solution designed for small and midsize CSP

MONTREAL, QUEBEC, CANADA, December 17, 2019 /EINPresswire.com/ -- Ni2, a provider of agile Operating Support Systems (OSS) solutions announced today a partnership with Worldwide Supply, a global provider of networking hardware and Managed IT services solutions with an expertise in the data, wireless and wireline technology sector.

“

Ni2 is delighted to partner with Worldwide Supply and add to its solutions offering.”

Joseph Hatchuel, Head of Partner Alliances at Ni2

As Communication Service Providers augment their existing infrastructure or install new fiber networks, this partnership aims to deliver them a unified network, outside plant and data center management solution that optimizes capacity, increases network reliability and ultimately increases service quality. Ni2 uniquely delivers a Unified Inventory that allows to map all outside/ inside plant resources and services into a single “source of truth”, providing CSPs the most complete and comprehensive

view of their network—from fiber to circuit to customer. The Ni2 agile OSS consists of open and modular management applications that offer Tier 2-3 service providers the flexibility to successfully deploy an OSS at their own pace, ensuring incremental value as they modernize their operations.

“One of our top priorities is to serve as a solution provider to our customers. One of the ways we’ve been able to achieve this is by partnering with some of the top technology leaders in the world. This is what led us to the partnership with Ni2. Their unified inventory solution delivers clear visibility that results in enhanced capacity assessment and service impact analysis. That solution really resonates well with our customer base, especially those in the cable and telco side of our business. We’ve excelled at being a top-tier hardware supplier for 15 years, and now having these services and software solutions places Worldwide Supply in an elite class. We are very proud to be partnered with Ni2 as we grow and continue expanding our solution suite for our customers,” said Jay VanOrden, CEO of Worldwide Supply.

“Ni2 is delighted to partner with Worldwide Supply and add to its solutions offering. Worldwide Supply has built a robust expertise in networking equipment and service solutions by collaborating with CSPs all around the world. We look forward to enabling and supporting its clients with solutions that allow them to gain operational and business agility,” says Joseph Hatchuel, Head of Partner Alliances at Ni2.
