PUNE, MAHARASHTRA, INDIA, December 18, 2019 /EINPresswire.com/ -- [Organic Tampons Industry](#)

Description

An organic tampon is made of organic cotton and is free of any chemicals. It comes with an applicator that is made of bioplastic material. Natural and organic tampons come under Class II of medical devices under FDA and CE regulations in the US and Europe, and are manufactured under strong guidelines by the vendors in the particular region.

There have been instances of signs of early puberty among girls as young as seven. Some of the major reasons for early puberty include unhealthy food habits, obesity, and stress. An average woman may have approximately 400 menstrual cycles in her lifetime. Women who reach puberty at a young age go through even more number of cycles and use higher amounts of feminine hygiene products. This drives the demand for various products such as organic tampons. Furthermore, there is a notable rise in awareness of health and hygiene among women when compared with the last decade.
