## [Water Softener Market 2020](#)

### Market Overview

The professional survey on Global Water Softener Market Report 2019, conducted by the United States Geological Survey declares that 85% of all regions in the U.S. are supplied with hard water. This type of water has maximum concentration of minerals and salts that reaches the core of the water supply. It affects our health and implies negative impacts on our daily household activities like cleaning, laundering and dishwashing. Most times, a white ring of salts is formed on most of the products because of the hard water and the salt in this water is with the same composition as sweat.
