

MoviTHERM is Celebrating its 20th Year in Business

MoviTHERM, a leading Thermal Imaging Solutions Provider is celebrating its 20th Business Anniversary.

IRVINE, CA, USA, January 6, 2020 /EINPresswire.com/ -- For over two decades, [MoviTHERM](#) has been serving customers in the United States, Canada, Mexico and beyond with advanced thermography solutions. The company's unique solutions portfolio as well as its capable engineering team make MoviTHERM a valuable resource for everything involving non-contact temperature measurement.

MoviTHERM - Advanced Thermography Solutions

MoviTHERM started out like a small engineering consultancy back in 1999, developing custom thermal imaging software solutions. The company later became a FLIR camera distributor and added turnkey solutions to its offerings.

“

We were part of two decades of technology innovation that only very few people in this world get to experience. I couldn't have done it without my team, which I am very proud of!”

Markus Tarin, President and CEO

MoviTHERM's Infrared Non-Destructive Test Systems are being used by many major aerospace companies for [defect detection](#) in carbon composite structures.

“We were involved in many state-of-the-art technology endeavors, ranging from flying cars, rockets and other space crafts, electric cars, airplanes and the list goes on. We have a very special company with a very unique set of skills, unmatched in the industry.”, adds Markus Tarin, President & CEO.

The company's work has also contributed to several media productions, from product marketing videos and

documentaries, to TV shows as well as the MTV Video Music Awards topping the list with a live broadcast of a music video shot in complete darkness using only thermal cameras.

We are looking forward with excitement to what the thermal imaging challenges will be in this coming decade.
