The Men Behind the Holocaust.

Before the Nazi regime even came to power, German psychiatrists proposed the extermination of mental health patients and developed processes and systems to murder patients by the thousands with euthanasia, including eugenically sterilizing patients. [1] Then, during Nazi Germany's reign, organized psychiatry established six psychiatric facilities where 100,000 German mental patients were killed. These psychiatric facilities provided the training, personnel, and technologies to exterminate millions of Jews and other people the Nazi psychiatrists deemed unworthy of life. Medical professionals who participated in the post-Holocaust Nuremberg trials concluded that the Holocaust would not have factually taken place without psychiatry's influence and irreplaceable role.

## About CCHR:

Initially established by the Church of Scientology and renowned psychiatrist Dr. Thomas Szasz in 1969, CCHR's mission is to eradicate abuses committed under the guise of mental health and enact patient and consumer protections.

It was L. Ron Hubbard, the founder of Scientology, who brought the terror of psychiatric imprisonment to the notice of the world. In March 1969, he said, "Thousands and thousands are seized without process of law, every week, over the 'free world' tortured, castrated, killed. All in the name of 'mental health.'"
