TV-Glasses from iGlass USA inc

## TV-Glasses Specifications:

- Hybrid, opaque in front, open on the side, similar to TV watching setting
- 3840x 1080 resolution (4k)
- 500" screen size (90deg diagonal)
- 150g
- All-in-one device, USB cable connection to external power bank

## TV-Glasses Key Features:

- UltraSharp image clarity, comparable with luxurious laser projector's visual quality
- Semi-immersive theater experience with surrounding awareness, open and safe
- Portable, light-weight, comfortable to wear for up to 6 hours
- Private, only the wearer can see the big screen, no light-pollution to others
- Works with current 2D/3D content, no device specific content per-processing necessary
- 5G ready, online streaming YouTube, Netflix, Prime Video in Big Screen
- Virtual screen at 5 meters away, with eye relaxation and vision protection
- Ultra high image quality yet affordable

## TV-Glasses Experience Advantages

- Openness: semi-immersive, allows surrounding awareness, open and safe
- No motion-sickness: open AR screen architecture ensures motion-sickness free
- Comfortable: zero pressure on nose and face, even little kids can wear it for long periods of time
- Compatibility: fit daily prescription glasses underneath easily, no habit change
- Simple plug and play: easy to use, suitable for novice users to engage casually

## TV-Glasses Typical User Cases

- LCD TV, Laser Projector screen, Theater screen, and IMAX screen replacement
- Mobile BIG SCREEN for Gaming Console like Nintendo Switch, Xbox, PlayStation
- Mobile Entertainment in College Dorm, or on Airplane, High-speed rail, and passenger seats of car
- Portable and private BIG SCREEN Multi-monitor for PC, laptop, and Tablet
- Visual impairment enhancement, Education and Medical Application, Industry Application, and many others...
