High-risk work groups for exposure to asbestos in Oregon include Veterans of the US Navy, power plant workers, factory workers, truck building workers, maritime workers, pulp and paper mill workers, public utility workers, plumbers, electricians, welders, auto mechanics, machinists, and construction workers. In most instances, the diagnosed person's exposure to asbestos occurred in the 1950's, 1960's, 1970's, or 1980's. www.karstvonoiste.com/

According to the American Cancer Society for nonsmokers who have been exposed to asbestos in their workplace the risk of lung cancer is five times that of unexposed workers. <https://www.cdc.gov/cancer/lung/statistics/index.htm>.

The US Navy Veterans Lung Cancer Advocate says, "If your husband, dad, coworker or neighbor has just been diagnosed with lung cancer and you know they had significant exposure to asbestos in the navy, at a shipyard or while working at a factory, at power plant, public utility, or as a plumber, electrician welder, mechanic or any kind of skilled trades group in any state please have them call us anytime at 800-714-0303. Most people like this never get compensated-even though the asbestos trust funds were set up for them too. We are trying to change this sad fact." <https://USNavyLungCancer.Com>

States with the highest incidence of lung cancer include Kentucky, West Virginia, Maine, Tennessee, Mississippi, Ohio, Indiana, Louisiana, Arkansas, Missouri, North Carolina, Rhode Island, Alabama, and Delaware. www.karstvonoiste.com/

For more information about asbestos exposure please visit the NIH's website on this topic: <https://www.cancer.gov/about-cancer/causes-prevention/risk/substances/asbestos/asbestos-fact-sheet>.
