Globally recognized GoodFirms is a leading B2B research, ratings, and reviews platform. It assists the service seekers in connecting with brilliant service providers from various industries. At GoodFirms, the analyst team conducts a strict assessment, which includes several qualitative and quantitative measures. The research process has three main key factors that are Quality, Reliability, and Ability. Each element is segregated into several metrics, such as identifying the past and present portfolio, experience in the expertise area, online reputation and client feedback.

Focusing on the overall research process, every agency obtains scores that are out of a total of 60. Hence, considering these points, all the service providers are indexed in the list of top development companies and the best software. Here you can also check out the newly curated list of [Best Reference Management Software](#) based on several research metrics.
