Center Valley dentists at Castle Dental provide dental implants.

Dental implants are a popular method for replacing missing teeth. They are placed directly in the jaw bone. Over several months, the jaw bone attaches to the implant and a crown is added for a natural, finished look.

“

Dental implants are predictable, durable, and natural-looking.”

Dr. Matthew Lang

“Dental implants are predictable, durable, and natural-looking,” explains Dr. Matthew Lang. “There are millions of Americans with dental implants.”

At Castle Dental, implants are placed using the Galileos 3D Dental Conebeam. The high-tech tool provides an accurate, clear mouth scan and helps dentists put together a treatment plan while you are in the dental chair.

Other services available from Castle Dental include dental crowns, tooth whitening, and veneers. General dentistry in Center Valley is also available. To request an appointment with Castle Dental, visit <http://castledentalcare.com/appointment-request/>. New patients are being accepted.
